Advantages and Brief Machine Description

ML

BottleTransport

MultiTrans-B

- proven and solid assembly construction
- cheeks 200 mm high and 3 mm thick
- stable stainless adjustable calotte feet
- few edges and corners
- continuously designed in 45 degrees, so no grime residues will be left

- hygiene design in all areas
- **TakeOff**- design - cheek viewing panel
- label protection rail
- cleaning nozzles in interior, one nozzle per chain
- rail bracket without dirt edges
- durable, cost effective and reliable

- cable channel in open wireframe design
- protection cap with 20 degrees descent
- very few buying-in parts
- open and clear construction
- automatic lubrication possible
- high amount of stainless components
- few screws and clamping links

- **MultiLiner**, pressureless gatherings
- for glass, PET, cans
- food and non-food
- unique open control system with SPS-S-7
- output range 5.000 - 70.000 BpH
- efficient and renowned German assemblies, e.g:
 - o Siemens S7
 - o maintenance panel OP 3
 - o Klöckner Moeller
 - o Bosch

Advantages of our **MultiLiner**-control for the customer

- the control system can be maintained by the personnel through an OP3
- open and clear control concept by SPS-S7
- no dependent firm-related control (customer is bound on a long-term basis)
- low costs for service and spare parts
- modem connection for service
